

# MES SUITE PROefficient SOFTWARE FOR THE DIGITAL PRODUCTION

## PROview

Live Monitoring

The MES Suite provides the basis for forward-looking decisions that affect your production. Improve your machine utilisation and make optimal use of your personnel. The networking of man and machine is a basic prerequisite for entry into Industry 4.0. Production data is collected and can be made accessible to every system in the Smart Factory.

## PROwork

Evaluations/Analysis/KPIs

## YOUR CHALLENGES

- Lack of time
- Lack of transparency
- Increasing competitive pressure
- Poor information management
- Individual processes
- No allocation of responsibilities
- Lack of basis for automated optimisation processes
- Poor machine utilisation
- Long processing times

## OUR STRENGTHS

- Optimisation through increased productivity
- Improved efficiency
- Optimal timing
- Reduction of processing times
- Quick identification of problems and errors
- Networking of personnel, machines and data
- Digitalisation and modernisation
- Elimination of faults and interruptions
- Creating a Smart Factory in the sense of Industry 4.0

# LIVE PRODUCTION DATA PROview

## REAL-TIME VISUALISATION OF YOUR PRODUCTION DATA

By digitising your production, you have the possibility to visualise the status of your equipment, etc. Live at any time.

## ALWAYS INFORMED - ALWAYS UP TO DATE

You have a live view of your production data anytime and anywhere and can evaluate it as you wish.

## LIVE VIEW IN YOUR INTERACTIVE FACTORY AND WORKSHOP PLAN

Through our MES solution, you can view all machines in each plant at a glance in real time and intervene directly if necessary.

# EVALUATIONS - KEY FIGURES – ANALYSIS

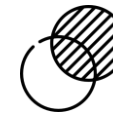

## PROwork

Machine logbook and stoppage graphic

### UP-TO-DATE AND ACCURATE RECORDING AND EVALUATION OF YOUR MACHINE DATA AT ALL TIMES

With **PROwork**, the collected data can be evaluated in any form of data, diagrams and key figures that you require.

### ALWAYS KNOW WHAT IS HAPPENING - CREATE TRANSPARENCY IN YOUR PROCESSES

By capturing your machines, you have the possibility to map your entire production. Information is available anytime and anywhere, for e.g. you can react immediately to production downtimes.

### NUMEROUS EVALUATION OPTIONS IN THE BASIC PACKAGE

Through years of experience in the field of data collection, we have constantly developed our know-how in close cooperation with our customers - and that regardless of the branch, for your digital future.
